

PRODUCT TECHNICAL SPECIFICATION

DECORATIVE PANELS FOR WALLS AND CEILINGS

FAMILY PRODUCTS: “DOMIDECOR LEATHER”

The Domidecor Leather is a decorative product made for coating walls. This product is made with high quality board (MDF moisture resistant) and coating with leather fibers.

The panels are applied to the wall with battens and fixed with staples or pins.

This product is certified ISO 9001:2008 (quality management) and PEFC (chain of custody). It ensures that the product is manufactured with sustainable wood management.

A. - FIBERBOARD CHARACTERISTICS

CHARACTERISTICS	STANDARD	VALUES
Class of board	_____	MDF (moisture resistant)
Fiberboard Density	EN 323	≥700 Kg/m ³
Nominal thickness	-----	8 mm
Swelling - 24h	EN 317	≤12%
MDF- Formaldehyde Content	EN 120	Class E1
MDF- Reaction to fire	RD 842/2013 (tabla 1.3-1) Spanish legislation	Class E

B. - COATING CHARACTERISTICS: RECYCLED LEATHER.

Coating composed by 100% recycled leather fibers and 100% polyurethane finishing or resins water solution.

b.1. Light resistance: grade 5 (standard test - UNE 56843).

C. DIMENSIONS

LENGTH: 900 mm

WIDTH: 252 mm

E. MAINTENANCE.

This product is for indoor use only. Don't apply panels on walls or rooms with high moisture.

The cleaning should be with a slightly damp cloth with water or dry.

Do not use chemical products containing alcohol, acetone or ammonia. They may cause significant damages and degradation of the surface.
